Course Director

## Dr. C. Murugavel

Dr. C. Murugavel is a qualified Oral and Maxillofacial surgeon graduated from Govt. Dental College, Tamilnadu Chennai.

Dr. Murugavel is an expertise in various fields of Dentistry and his quest for knowledge has made him very proficient in the field of Laser dentistry and Basal implantology. He is a certified Basal Implantologist with extensive experience in immediate loading implantology. He has acquired his Associate Fellowship in dental lasers from World Clinical Laser Institute USA. He has been using Lasers successfully in his general practice for the past 6 years.

He is an articulative Teacher, with his sound knowledge, intense passion and desire to spread the knowledge of dental implants and the use of Lasers in dentistry to young graduates and clinicians he has been conducting various training in the past few years.

### Why Immediate Loading Implants?

Immediate loading Implant in technology and technique have come with an increasing patient awareness which has also meant that more and more patient want to seek implant dentistry as an option and growing marketing in the virtual space has resulted in many wanting immediate results.

### Utilizing Implant in your Practice:

General Dentists/ all specialties can successfully expand their service mix, while helping patients avoid the social stigma and health issues that accompany tooth loss.

Continuing advances in technology, imaging and ceramic materials have made implant therapy less invasive and more reliable than ever. As a result, dentists who integrate implants into their service mix gain a strategic competitive advantage, which can produce a new revenue stream for sustained, predictable growth.

### Course Overview:

With the marked increase in life expectancy of our patients, it soon became clear to us to master Immediate Loading Implant system. This program has been meticulously prepared to cover all aspects of the basic and clinical sciences related to this developing discipline.

### *Academy of Continuing Dental Education*

welcome you to this program whose ultimate aim is to enable you to offer your patients the highest professional care they legitimately deserve.

### Learning Objectives:

This course is designed for dentists of all specialties who have limited or no experience with dental implants. Attendees will learn the basics and practical procedures for simple, single Piece implant placement and restoration. Those who complete the course will gain the skills and insights needed to confidently.
